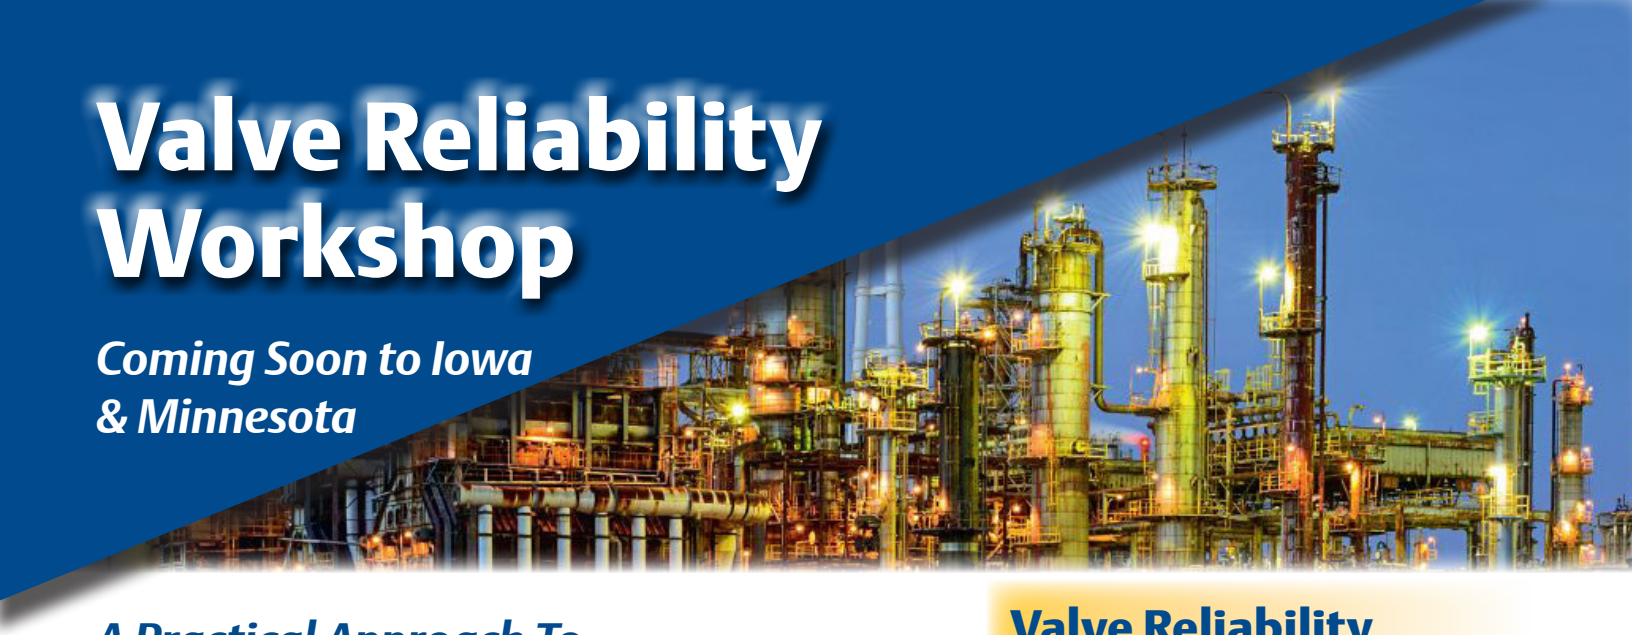
Valve Reliability Workshop



Coming Soon to Iowa & Minnesota

A Practical Approach To Valve Maintainance

Your plant has many different valve types that control and protect your processes. Our experts will review the basics of how these valves function and share some tips and tricks to maintain and repair them. Our goal is to give your team confidence about what is needed to keep your assets operational and increase your plant availability. There will be a keynote presentation about how Top Quartile Performers optimize valve performance and reliability that includes newly released control valve maintenance intervals.

Following are the instructor-led breakout sessions that you can chose from:

- Industrial & Natural Gas Regulators
- Y-Pattern Globe Valves, Steam Traps, TOSV, Steam Regulators
- Isolation Valves
- Pressure Relief Valves
- Tank Walkdowns & PRV Monitoring
- Control Valve Diagnostics
- Electric Actuators & MOV Diagnostics
- Pneumatic Scotch Yoke and Rack & Pinion Actuators

Featured Keynote Speaker:
Mark Nord, Control Valve Architect
Emerson Automation Solutions
- ***"Reliability: A Secret Weapon for Top Quartile Performance"***

Valve Reliability Workshop:

- **Des Moines, IA**
  Date: Tuesday, June 20, 2023
- **Shakopee, MN**
  Date: Thursday, June 22, 2023

- **Times:** 8:00 AM – 4:00 PM
- ***Continental breakfast / lunch included***
- ***Tradeshow and Networking to follow***
- **Cost:** $95.00 per person.

Who would benefit from this:
This workshop is appropriate for mechanics, technicians, engineers, maintenance supervisors, and reliability specialists.
